This months tip

Don't want to give Mr Kodak \$multiple for a grey card? Print one off your computer. Open word. Go to Format on the menu bar and choose borders and shading. Choose the page border tab and the setting is at none (no lines around the border) and move to the shading tab. The fifth box on the second line gives you a value of 50% grey, very similar to a grey card. Keep pressing the enter key to fill the page, Or get a friend to print one out for you.

Workshops
